Minuteman Hearth Accessories

- Handcrafted with traditional hammer and anvil method
- Each piece is individually hand-forged and hand-welded
- Tool set rods are made of solid brass or steel

Minuteman products are individually handcrafted to particular specifications, using a variety of manufacturing techniques and materials.

Minuteman's in-house design team brings together varied expertise—mechanical engineering, architecture, fine art, sculpture, and metallurgy, to create and develop a wide array of products.

Its quality and durability withstands both indoor and outdoor use.

Hearth Rugs

Canyon Hearth Rugs

Goods Of The Woods Canyon Rugs are super sized at 72"x36". These half-round hearth rugs are made of synthetic fibers which perform similar to nylon but have slightly lower melt temperatures.

These rugs meet the CPSC standard FF 1-70 for flammability of carpets. Rug will not continue to support combustion once the ignition source has cooled or been removed. The ember that pops out may char a spot on this hearth rug, but the rug will not burn; it will protect the underlying surface.

Color	Item #
Black	COP47156
Barnwood	COP47158
Crimson	COP47157

Guardian Fire Resistant Hearth Rugs

The 100% fiberglass face on these rugs is simply not damaged by small embers or sparks. The back is heavy vinyl that lays flat and is non-staining and fire retardant. These half-round rugs may be spot cleaned with a sponge and dish soap. All rugs measure 48"l x 27"w.

Color	Item #
Charcoal	COP47150
Tan	COP47155

Orian Rugs, Select Styles

Firestarters

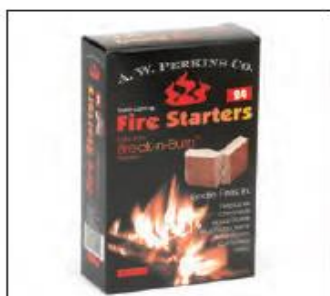

HomeSaver Gelled Fire Starter

Stove Bright Fire Starter Gel

Firestarter Gel	Item #
Homesaver Gel 8 oz, case of 12	COP81708
Homesaver Gel 16 oz, case of 12	COP81716
Homesaver Gel 32 oz, case of 12	COP81732
Stove Bright Fire Starter Gel	COP43610

Paraffin Squares

A.W. Perkins Fire Starters are blocks of paraffin-impregnated wood chips. Break a couple squares off the block, put them in contact with your wood, and light them — "break 'n' burn". They will burn 8–12 minutes to get your fire going.

Squares are 1 3/4".

Size	Item #
Small box, 24 squares	COP81180
Large box, 144 squares	COP81190

Gas Starter Pipes

Gas Starter Pipes provide an easy way to light a wood fire in a fireplace. These pipes have 1/2" pipe threads, and install easily. Each length has several 1/8" orifices which emit gas and spread the flame evenly under the logs. Units available with mixing chambers for use with natural gas or LP. *California Customer See Warning Below.*

Gas Starter Pipes	Item #
T-Style with mixing chamber for natural gas, 2 pipes each 8"	COP47120
90° Elbow with mixing chamber for natural gas, pipe length 17"	COP47100
Straight Pipe with mixing chamber for natural gas, pipe length 17"	COP47115
Straight Pipe with mixing chamber for LP, pipe length 17"	COP47117

Gas Shut-Off Valves

Machined out of solid brass stock, these valves are certified by the American Gas Association to withstand up to 90 lbs. of pressure. Available either straight or angled; both with 1/2" pipe thread fittings. Valves come with a 3" x 1/4" – 5/16" shut-off key.

California Customer See Warning Below.

Valve	Item #
Angled	00115186
Straight	00115185

Gelled Firestarters

Gelled fire starters were first used for pellet appliances, but they caught on so well they are now used to start fires in woodstoves, fireplaces, coal stoves, and even campfires.

HomeSaver Gelled Fire Starter stays where you put it and doesn't flare up. It's odorless, smokeless, and burns longer than most other gelled fire starters. The small, 8 oz. bottle makes a great sample for your customers. *California Customer See Warning Below.*

Stove Bright's Fire Starter Gel is alcohol-based and provides the hot flame needed to get even pellet stoves started with ease. The gel stays where you want it. It doesn't clog catalytic converters and can be used in any solid fuel situation. It is odorless and does not alter food taste. *California Customer See Warning Below.*

Magicolor Flame Crystals

Here's a fun fire accessory from A.W. Perkins. These sprinkle-on crystals turn a wood fire into a dazzling display of color. 16 oz. shaker canister, case of 12.

Item #
COP81198

Gas Valve Keys

Replacement keys for the original. The socket end fits valves 1/4" – 5/16". *California Customer See Warning Below.*

Firebacks

Pennsylvania Cast-Iron Firebacks

Cast-Iron Firebacks protect the back fireplace wall and absorb heat to radiate it into the room. They lean against the back wall, but a great option is to display using fireback boots, (shown below). Fireback boots allow you to combine a fireback and a grate into an integrated unit. Use any grates shown under Fireplace Grates. *California Customer See Warning Below.* Call us today to special order additional Pennsylvania Firebacks not shown.

Great Oak Cast-Iron Fireback
18"w x 20"h x 7/8"d, 41 lbs.

Item #
COP61095

Small Oak Cast-Iron Fireback
18"w x 16"h x 1"d, 33 lbs.

Item #
COP61094

We The People Cast-Iron Fireback
18"w x 21 1/2"h x 5/8"h, 44 lbs.

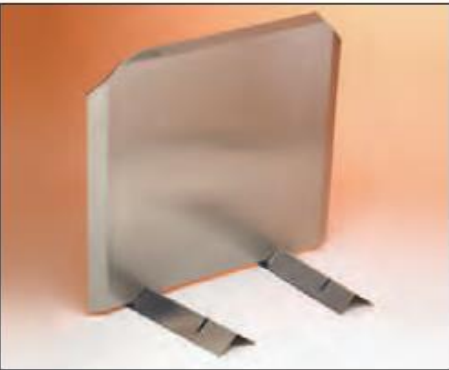

Item #
COP70128

Pennsylvania Fireback Boots

Fireback boots hold up a cast-iron fireback and provide holes for the back feet of a fireplace grate. This integrates the fireback and the grate into a connected unit. *California Customer See Warning Below.*

Size	Item #
Small Boots, set of 2, 21/2"w x 41/4"h x 8"l, 11 lbs.	COP61096
Large Boots, set of 2, 21/2"w x 5" h x 8"l, 11 lbs.	COP61097

Stainless Radiant Firebacks

This Woodfield fireback protects the back wall of the fireplace and reflects heat to the room. Each fireback has a gentle curve applied to its back. This pre-stresses the fireback to minimize warping. Constructed of 14-ga., 304-alloy stainless steel, the Radiant Fireback weighs in at about one sixth the weight of a cast-iron fireback. It's easier to handle. Slotted support legs allow you to adjust it to three angles: 65°, 75°, and 90°. The legs are 1"h, 2 3/8"w, and 11"l.

Item #	Size
COP70020	15"w x 15"h
COP70030	18"w x 16"h
COP70060	20"w x 20"h
COP70070	24"w x 24"h
COP70080	27"w x 27"h

Additional sizes available Factory Direct.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Fireplace Grates

Vestal Cast-Iron Safety Grate

This grate is self feeding. Its deeply curved shape lowers burning logs to the grate bottom, rather than letting them tumble onto the hearth, eliminating a possible fire hazard.

Item

23 3/4" front × 18" back × 15" deep
Leg height 2 1/4". 32 lbs.

COP26432

Hy-C Sampson Cast-Iron Grates

This grate has optional sections that can be added to the middle. Each section is self supporting and increases the width of the grate by 7". These grates work very well with Pennsylvania firebacks and fireback boots.

California Customer See Warning Below.

Item

Small 18" front × 15" back × 15"
deep. Leg height 3". 25 lbs.

COP46020

Large 22" front × 18 1/2" back ×
15" deep. Leg height 3". 27 lbs.

Firemizer Heat Grid for Grates

PLACE ON GRATE TO REDUCE FUEL USAGE AND CREOSOTE

Firemizer is a special mesh of stainless steel alloy fibers designed to optimize the performance of fireplaces. Several independent university tests have demonstrated that Firemizer reduces fuel usage up to 33% and minimizes creosote in the chimney by up to 57%. This patented product is not catalytic and does not contain chemicals, but it slows the air flow to reduce the burn rate, and it conducts heat evenly across the fire to ensure all fuel is burnt and that small pieces of fuel do not fall through the grate.

Firemizer is simply placed on the grate, under a wood or coal fuel. It can be easily dusted off and it works for about 500 hours.

Description	Item #
SS fiber mat, 14" × 20"	02473667

Extra Brass Screen Pulls, one pair

Thermo-Rite® Celebrity Clearview® Glass Doors

- Black Powder Coated Finish
- Clearview bi-fold doors
- Lifetime warranty on glass

Glass doors provide spark protection, and keep room air from exiting up the flue. Thermo-Rite doors are perfect for new installations and for replacements.

Crafted from anodized aluminum, this enclosure features a 4" frame, full-swing bi-fold trackless doors and mesh curtain.

This textured black model has 1/4" tempered bronze glass with the "Clearview" feature — no vertical brass strips. Heavy duty 19-ga. mesh already installed.

Note: Order the right size and style door, as these cannot be returned.

American Panel Stove Boards

- Beautiful stones and tiles, artfully laid
- Steel frame for strength and to protect edges

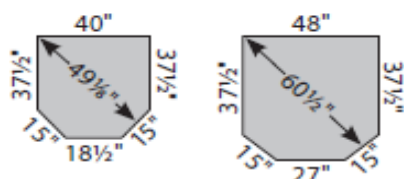

These beautiful stove boards are crafted from a variety of quality slate, ceramic and porcelain and expertly finished for maximum durability. Enjoy the security of knowing your stove board meets all of the latest industry safety standards.

40" stove boards are Type 1 — ember protection only. They are built with a heavy duty 1" steel frame, automotive type e-coat paint process for frame, and ½" non-combustible substrate.

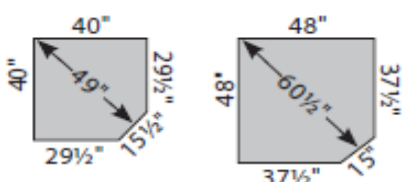

48" stove boards are Type 2 — ember and thermal protection. The boards have an r-value of 1.61 as required by many wood burning stoves. They are built with a 1.5" heavy duty extruded aluminum frame, automotive type e-coat paint process for frame, ½" non-combustible substrate, and an additional ½" of thermal protective Micore 300 under the complete hearth pad. Additional features include: no removal of carpeting required, only non-combustible materials used, tested to most recent standard, and can be installed on risers that require additional thermal protection.

Stove Boards

White Sand Tile

American Panel Modular Stove Boards

- Individual tiles assemble to a single corner board or to a double corner board
- Patent-pending

The American Panel Type 2 modular stove boards are the most innovative approach to hearth protection on the market. These patent-pending stove boards contain only non-combustible material, utilizing an easily assembled modular steel backer with tile. They can be assembled to either single- or double-corner style.

Shipped in a well-engineered box designed to protect the hearth pad from damage, to reduce the shipping damage associated with one piece boards, making the smaller boxes are easier to store and work with. The 1 1/4" stove boards provide an R-value of 1.61 to meet most any need.

Out of box to fully assembled in 7 minutes.

Hy-C Black Stove Boards and Hearth Extender

Protect your customers' floors or walls from the intense heat, hot coals, ashes, and soot that woodstoves can produce. The embossed pebble-finish steel resists scratches and hides blemishes.

These black stove boards can be used under other heating appliances such as kerosene, gas, and electric heaters. UL Listed and UL Approved as a wall shield when installed with the heat shield spacer kit. These boards have a 1.6 R value. *The smallest board and hearth extender can ship UPS. The others must ship via freightline.*

R-CO Stove Boards

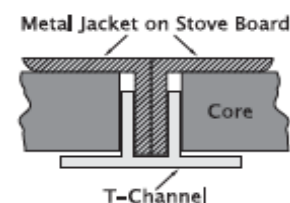

- Protects both floor and walls from heat
- Easy assembly

Protect floors and walls from heat, coals, and ashes. R-CO Stove Boards can be installed on walls with no spacer needed, reducing necessary stove clearances by 66%. (12" minimum clearance is always required.) These boards have a 3 R value.

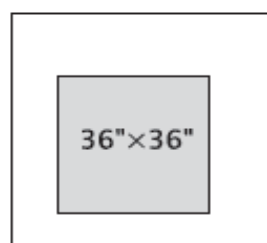

Stove boards come in brick and gray tile. The brick style has a textured surface, while the gray tile surface is smooth. Both styles have recessed mortar joints to give a three-dimensional effect. Stove boards are approximately 1 1/4" thick.

All R-CO Stove Boards ship UPS, except the 48"x48" size.

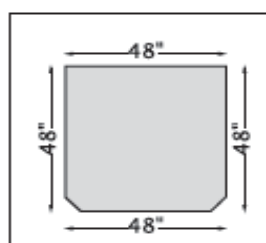

There are four panel sizes and a matching brick hearth extender. Panels easily attach together with a T-Channel, which is included. See the diagrams below for configurations.

Stove Boards

Ember King Type 1 Boards

- Quality 10-gauge plate steel construction
- Scratch-resistant powder coated finish
- Strongest and most durable hearth board available
- UL Listed, Type 1
- Made in the USA

These Ember King boards are a Type 1 spark and ember floor protection. They feature a low profile view, which compliment any traditional or contemporary heating appliance. The textured black powder coated finish is scratch resistant and will enhance any color stove.

These stove boards are only intended to be used as spark and ember protection. They do not provide thermal protection. Check your appliance manufacturer's installation instructions to confirm that these boards are approved with their stove. These boards are tested and listed by Underwriters Laboratories as a Type 1 spark and ember protection only. Proudly made in the USA.

Air Circulators

Ecofan

- Uses the heat of a stove to generate its own electricity
- Fan starts and stops itself

No unsightly electric cord and no batteries to change. Just place the fan on top of the stove. Heat produces an electrical current, which drives a DC motor and fan-blade that circulates the warm air throughout the room. As the stove gets warmer, more electricity is generated and the fan goes faster, boosting stove efficiency by up to 30%.
Two-year warranty.

Electric Air Movers

Thermoguard

The patented, matchbox sized device is wired to the homeowners thermostat to assist in heating a home. Its computer turns on the fan of the central heating system at intervals set by the homeowner. Thus, heated air from the wood, pellet, or gas stove is circulated throughout the home.

Item #

COP85100

Extra-Quiet Circulating Fan

This fan mounts high in a doorway or hallway to move warm air out of one room into another. Its swivel bracket allows directed air flow. It has a 12 ft. plug-in cord with one speed, 105 cfm. 5"×5", black.

Item #

COP71925

Comfort Geni

The Comfort Geni moves heated air from a fireplace or stove room to the next room, through a wall or floor. The library-quiet fan runs only when the source room reaches a designated temperature. The unit has fan speed settings and fan-heat-cool settings.

Comfort Geni 4x moves 40-100 CFM and fits register openings of 4"×12", 6"×10", and 6"×12". **Comfort Geni 6xr** moves 115-150 CFM and fits register openings of 6"×10" and 6"×12". The Geni 6xr comes with a remote control.

Both units are almond colored. Plugs into electrical outlet. Paperboard ducts connect the Comfort Geni through a wall or floor to a register on the other side.

Stove Add-Ons

HomeSaver Stovepipe Thermometer

Single-wall Stovepipe
Target Zone: 270°F – 468°F
A strong magnet sticks this thermometer to a single-wall stovepipe. Quickly glance to see if the stove is burning at the right temperature.

Chimgard Stovepipe Thermometer

Single-wall Stovepipe
Target Zone: 230°F – 475°F
The Chimgard's five-color face makes it easy to read. It attaches magnetically to the stovepipe. One-year warranty.

FlueGard Flue Gas Thermometer

Double-wall Stovepipe
Target Zone: 400°F – 900°F
This thermometer precisely measures the inner flue gas temperatures up to 1700°F. Just drill a 1/4" hole to insert the probe, and the thermometer mounts magnetically on the stovepipe. One-year warranty.

Condar Replacement Catalytic Thermometer

Catalytic Combustor
Target Zone: 500°F – 1500°F
This thermometer inserts into the catalytic combustor orifice and is the only way to be certain the combustor is up to proper working temperature. 4" long probe is easily trimmed.

Stove and Gasket Cement

A.W. Perkins Stove and Gasket Cement makes repairs on woodburning stoves and seals fiberglass gaskets into place. This black silicate, ceramic-type cement withstands 2000°F temperatures and comes in a 2.7 oz. tube and in a caulking gun cartridge.

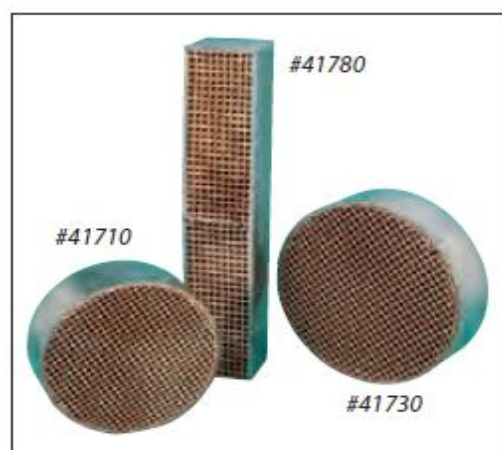

Description	Item #
2.7 oz. tube, black	COP81136
11 oz. tube, caulking cartridge, black	02479243

Self-Adhesive Fiberglass Insulation

There are lots of uses for this great product — Ideal for restoring the seal between the fireplace insert and the hearth. It comes in a 1½"×10' roll and features a peel-off, self-stick backing.

Description	Item #
1½" × 10' Roll	COP81210

Replacement Catalytic Combustors from Condar

A properly functioning catalytic stove burns more efficiently with less emissions and more consistent heat output.

A combustor that's cracking, crumbling, or peeling should be cleaned or replaced. The same may be necessary if the stove performance has dropped significantly.

All combustors come with a prorated, six-year warranty. Additional catalytic combustors available factory direct.

Description	Item #
6" round × 2" 25 cells/sq.in.	COP41710
7" round × 2" 16 cells/sq.in.	COP41730

Black Fiberglass Gasket

Black Fiberglass Stove Gasket is made of a high-quality graphite-impregnated fiberglass. It withstands abrasion better than any other gasket and handles heat up to 1000°F. Because it's black, it blends beautifully around windows and is almost invisible to the eye. It comes in a spool, and it is available in seven sizes, flat or round.

White Fiberglass Stove Gasket is also fiberglass, but is not as durable as black graphite-impregnated gasket.

Self-Adhesive Window Gasket

Griddle Gasket for Vermont Castings Stoves is an exact replacement for a worn or missing griddle gasket. It is a 5/16"×50" stainless, mesh-covered rope gasket.

Bad stove gaskets waste heat and fuel. Watch for the opportunity to replace them. Our **HomeSaver Replacement Fiberglass Stove Gasket** is easy to install. Simply remove the old worn frayed gasket, clean the surface, and glue in a new gasket with stove and gasket cement. These gaskets are braided, not coiled, so they do not unravel easily.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Stove Bright® Gas Vent Pipe Paint

Gas Vent Pipe Paint comes in brilliant colors to let you colorize your customer's direct vent pipe to match their gas stove. It is easy to apply and dries fast. Comes in 12 oz. spray cans. Temperature resistant to 250°F.

Brushable paint and additional colors are available special order.

Specialty Paints

Thurmalox® Black Stove Paint

This is a silicone-based, low-sheen paint popular for completely refinishing stoves and painting stovepipe and accessories. Touches up water spots, scratches, chipped spots, and more. 12 oz. spray can.

Item #

COP42100

HomeSaver® Black Paint for Stainless Steel

Unlike most paints which do not adequately adhere to stainless steel, this paint bonds to stainless without the need for primer. It resists heat up to 1200°F. 12 oz. spray can.

Item #

COP80010

Gas Appliance Fire Box Paint

This paint's black satin color is heat resistant to 1200°F. It's easy to apply and resists buildup of white deposits common in gas appliances. 12 oz. spray can.

Item #

COP43400

Stove Bright® Paint Prep

This citrus scented cleaner/degreaser is specially formulated for cleaning metal surfaces prior to painting. Use it for stoves, stovepipe, Class-A chimney, or any metal prior to painting. 11.5 oz. spray can.

Item #

COP43599

Stove Bright® Primer Paint

Primer paint serves as a heat-safe base for outdoor painting of metal chimneys and caps. Primer is a metallic red-brown color. Overpaint with any Stove Bright paint. 12 oz. spray can.

Item #

COP43299

HomeSaver® Spray Can Gun

This spray gun will improve your painting results and save hand fatigue. Available for use on all spray paints we carry, and on cans of spray adhesive.

Item #

COP42050

Creosote Removers

BY SAVERSYSTEMS

Cre-Away Bucket and Applicator

Cre-Away Squeeze Tube

Cre-Away

Cre-Away is great for drying and making creosote easier to remove. The squeeze applicator bottle allows you to treat the chimney and leave a bottle with the homeowner to treat the chimney with each fire. Come back in two weeks and sweep the flue to remove the ash-like substance that remains. Cre-Away is also available in a more concentrated professional formula.

Description	Item #
Cre-Away , 25 lb. bucket	COP24632
Cre-Away Applicator for 25 lb. bucket. Requires pressurized air.	COP24633
Cre-Away , 16 oz. plastic squeeze tube with applicator, case of 6	COP24630
Cre-Away Brochures , pack of 100	COP99332

PCR 25 lb. Bucket

PCR Applicator

Poulitice Creosote Remover (PCR)

Poulitice Creosote Remover (PCR) is designed to completely remove third degree creosote from flue tiles, stainless steel liners, and all masonry surfaces, acting as a poultice, dissolving, and absorbing the creosote. As the PCR dries it loses its adhesion and falls off the sides of the flue tiles or liner. The remaining PCR and creosote are easily removed by regular chimney sweeping methods.

Application. PCR is applied in accessible areas with a brush. In a smoke chamber it's applied with the SaverSystem Smoke Chamber Sprayer. In flue tiles or stainless steel liners, it's applied with the PCR Applicator and a winch system. The PCR Applicator includes applicators and hardware for 8"x8", 8"x12" and 13"x13" flues. Applicators for other flue sizes can be ordered through customer service.

ACS Gallon, Spray Quart

Anti-Creo-Soot™

Anti-Creo-Soot has two important uses:

- To remove thin layers of tarry or third-degree glazed creosote
- To prevent creosote buildup

ACS Liquid. ACS is highly effective at controlling creosote and soot and reducing pellet ash. A daily application to the fuel helps maintain the efficiency and safety of a woodburning, pellet, or coal appliance. ACS is a nontoxic, noncorrosive, nonflammable, water-based catalytic formula and is safe for stoves with catalytic combustors. It also helps prevent accumulation of excess ash and clogging in pellet appliances — just spray the fire chamber and lightly mist the pellets in the hopper.

Chimney Maintenance

MAINTENANCE PRODUCTS FOR A CHIMNEY INSIDE, OUTSIDE AND TOP

Creosote Removers

A.W. Perkins Dry Creosote Reducer

Dry Creosote Reducer is a granulated powder that often renders creosote brushable when sprinkled liberally on a fire — recommended for airtight woodstoves and fireplace inserts. 2 lb. tub.

Description	Description	Item #
Dry Creosote Reducer		COP23905

A.W. Perkins Airtight Creosote Remover

Spray inside airtight woodstoves and inserts a few weeks before sweeping to help remove thin layers of creosote. It also helps prevent buildup.

Case	Item #
1 case of 6 quarts	COP23910
2 case of 4 gallons	COP23911

A.W. Perkins Big Stick Soot Remover

Toss entire (unopened) tube into a brisk fire to remove and prevent dangerous creosote buildup. Use between professional cleanings. Use two Big Sticks weekly for the first month of treatment, then one per week for the rest of the heating season. Use only in airtight stoves, furnaces, and fireplaces. Colorful flames with no mess.

Case	Item #
Dry Creosote Reducer	COP81196

ChimneyRX DIY Chimney Maintenance Products

Safer Brick and Masonry Cleaner

This formulation of acids and cleaners is safer to use than muriatic acid. It reduces fumes and burns normally associated with muriatic acid. It can be used full strength for tough jobs or diluted for lighter cleaning. It is a breakthrough in masonry cleaning!

Description	Item #
Cleaner, 1 gallon	COP24601

Elastomeric Flashing Sealant

A long-lasting repair that is easy to apply. It stops leaks at flashings around chimneys, stacks, and vents.

Description	Item #
Cleaner, 1 gallon	COP24639

Masonry Chimney Water Repellent

Designed for chimneys and other vertical brick surfaces. It helps to prevent water damage such as efflorescence, freeze thaw cycles, and spalling.

Description	Item #
Repellant, 1 gallon	COP24628

Brushable Crown Repair

Permanently flexible and is easily applied with a brush. Dries in two to four hours.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Description	Item #
Repellant, 1 gallon	COP24402

Masonry Crack And Joint Sealant

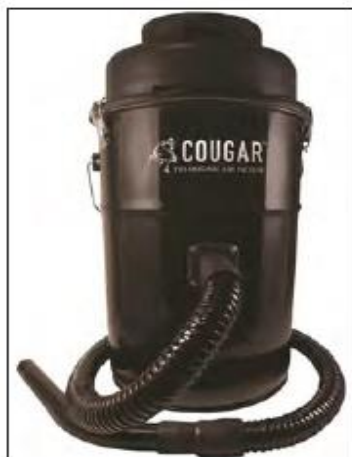

Used for sealing small cracks and defects in otherwise structurally sound masonry. It seals cracks up to 1/8" in mortar joints.

Description	Item #
Repellant, 1 gallon	COP24604

WARNING: This product can expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Vacuums

Love-less Cougar Ash Vacuum

This "no mess" vacuum removes cold to warm ash from wood stoves, pellet stoves, fireplaces, and barbecues. The patented two stage, high-density fire resistant filter system traps the finest ash particles. The Cougar includes metal construction of key components (3-gallon canister, flexible hose, and nozzle). Its powerful 6 Amp motor features replaceable brushes and bearings for extended life. Proudly made in the USA. 10 year limited warranty.

Description	Item #
Cougar Ash Vacuum Includes: (1) Cougar Ash Vacuum (22"x15"x15"), (1) Inner Filter, (1) Outer Filter, (1) 5-Foot Metal Flex Hose, (1) 13" Metal Nozzle, (1) 8-Piece Tool Kit, (1) Drawstring Tool Bag	03581937

A.W. Perkins Hearth Country™ Ash Vacuum

This is an economical HEPA filtered vac for cleaning up around a wood or pellet stove and fireplace. While not designed for hot ashes the vacuum is designed to prevent any hot debris from reaching the filter and additionally has a double insulated bottom. Featuring 85 CFMs, an 800W motor and a pre-filter to protect the HEPA filter this vacuum will provide years of

trouble-free service. Best of all, there is a built-in Shake Off™ feature to clear the filter while keeping the dust-proof lid in place. It has a 4-gallon powder-

coated black canister with a 5' flexible aluminum hose and an 8" pick-up nozzle, crevice tool and round brush.

HomeSaver® Air Fresheners and Deodorants

Chimney odors are mostly a symptom of a dirty flue combined with moisture. Once you attend to the problem by cleaning the chimney and installing a chimney cap, your customer may still have an odor problem. The smell has undoubtedly soaked into the porous brick and mortar.

HomeSaver Air Freshener

Use instead of aerosols for air deodorizing. The 32 oz. pump-spray bottle contains eight-times more deodorant than in a 20 oz. aerosol can. Nontoxic and biodegradable, it has a sweet smelling apple scent.

HomeSaver Chimney and Fireplace Deodorant

A wonderful rescue from fireplace odors! Place a bottle on the smoke shelf and pull up the wick — bingo, two to three months of freshness.

Description	Item #
1 quart (32 oz.) spray bottle, case of 6	COP82115
1 gallon container, case of 4	COP82125

Hearth Cleaners

Paint "N" Peel Fireplace Cleaner

Paint "N" Peel is a safe and effective way to clean fireplace faces. The product is brushed on 1/8"–3/16" thick, over the area you want to clean. Over the next 24–48 hours Paint "N" Peel will dry to a rubbery non-hazardous film. Once completely dry it can be easily peeled away and discarded leaving a cleaner surface behind. Covers 20–40 sq. ft. per gallon, depending on the texture and density of the surface.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Direct Wire Ionization Smoke Detector, AC/DC

Approved by the FHA, HUD, the NFPA, and the California State Fire Marshal to fit all standard electrical box configurations. Install it in one area or in multiple locations in a home and/or business. If you're installing in multiple locations, there is a limit of 24 units.

Item

00610108

Spring-Loaded Hy-C Smoke Guard

This ingenious device cures most smoking problems resulting from a flue sized too small for the fireplace opening. The smoke guard can be used to reduce the height or width of the fireplace, thus reducing the fireplace opening. It is spring-loaded, adjusts from 28½" to 48", and installs without tools.
